Tech Leadership

West Delhi, Delhi, India

Summary

Java Tech Lead and experienced in working on Finance Domain projects.

Worked on agile methodology for product delivery using jira as the primary tool.

Experienced in scratch development of project. Delivered CRMZ for amtrust from scratch. Handled multiple roles of Tech Lead, Scrum Master and independent contributor with hands on coding.

Considering the shift in industry demand from traditional leaders who are people managers to more hands on approach I fit the box. In amtrust lead a team of 10 people to successfully delivering scratch developed project. It was insurance domain application launched in Vietnam, Philippines and Indonesia. Helped company to establish their IT department ranging from hiring the resources to designing the app(front end using angular & backend using SpringBoot2).

Worked in experian as a lead for SAAS project delivery of their security module implementing veracode and sonar in the project.

Worked as a senior software developer in IHS-Markit in the capacity of individual contributor.

Accenture was the company from where I started my journey as a associate software developer.

I have a simple approach to life. Till I am learning, I am growing.

Experience

Happiest Minds Technologies

Senior Enterprise Architect

April 2026 - Present (4 months)

India

PureSoftware Ltd

2 years 3 months

Principal Architect

January 2025 - Present (1 year 7 months)
